

## ***2004 AERONET/PHOTONS Spain Workshop***

***May 10 to May 14, 2004***

***El Arenosillo (Spain)***

For publication of the proceedings of the workshop with the format of Pure and Applied Optical Journal of the Spanish Society of Optics the following scheme will be followed:

Each work must consist of:

1. *Titles in English and Spanish (only for those of you who can write in this language), Name of the author or authors, Affiliation(s), Address(es) and corresponding electronic directions.*
2. *Abstracts:* All the works will have two summaries of extension no superior to 8 lines each one, written one in Spanish (see above, same comment) and another one in English, respectively containing a section for Key Words in Spanish (see above, same comment) and Key Words in English.
3. *References and Web Links,* should be placed after the abstract in a single column and according with accepted nomenclature for scientific publications.
4. *Sections and subsections,* according to author's criterion, although they must adjust to the conditions indicated in the sections: *Extension of the works and Presentation of articles.*
5. *Conclusion and Acknowledgements,* according to each case.

Following instructions should be used for presentation of the articles:

- *The communications should be* sent in electronic support, in .doc format and in the style used by the journal, for which you can use the model of the attached file: "OPA-Template.doc". Text, figures and tables should be included in the file.
- The articles should appear in electronic file that, without compressing and including the graphs and figures, do not exceed 1.0 MB. [In printed format, comes to be equivalent approximately (depending on the size and resolution of the figures and the graphs) to 6-8 pages DIN A4, single spaced lines, with margins of 2.5 cm by each side, so that tables and figures are included in the text].
- Use 10 pt "Times New Roman" font. Use double column 7.5 cm width and single spaced lines.
- *The figures* should never be greater than the wide of two text columns. Lines, letters and numbers that appear in figures, must have a thickness and an appropriate size to allow clear perception. If there are *photos*, must have the contrast adapted for correct vision. *Figure captions* must be located, properly numbered, below the figure. *Equations* must appear centred in the text. *The tables* must appear, also, built-in in the own text and all of them must include a table caption that describes it and allows to understand it without read all the text. Equations and figures are *numbered* consecutively in Arabic numerals and tables in Roman numerals. Figures, drawings, schemes, equations, photos and tables width must correspond with one or two columns of text.

- *References* will be mentioned as superscripts with bold face in the text, and will be inserted at the beginning of the work, numbered in brackets by appearance order. *Web Links* must appear written for their direct use. The abbreviations used in the bibliography must be the same ones that are used of general form in scientific literature (like example, we mentioned the direction: <http://www.library.ubc.ca/scieng/coden.html>).
- *Font size, text presentation and content* of each section and subsection, come specified in the template "[OPA-template.doc](#)" as an example.
- The layout of the page will be vertical, with 2.5 cm margins: left, right, inferior and superior. Page numbering will be centred on the inferior margin.
- The resulting ".doc" file should be sent by electronic mail to the direction: [editor.opa@sedoptica.es](mailto:editor.opa@sedoptica.es).
- The deadline for the presentation of articles and communications, will be **July, 15th 2004**.
- All the presented/displayed communications to OPA, will follow the process of revision and edition through the Steering Committee of the Workshop and the Scientific Committee of the journal.

The instructions for the accomplishment of these articles also appear in the electronic direction of the magazine: <http://www.sedoptica.es> in the section "*Normas de publicación*".

- ❖ The interchange of communications between the edition team and the authors, reviewers.... will be held by electronic mail.
- ❖ Confirmation receipt will be sent to all the received scientific works. Once reviewed the work, authors will be informed.
- ❖ To criterion of the Steering Committee of the Workshop and the Publishing Committee of the journal, articles of greater extension and different format will be acceptable for publication.

El Arenosillo – Spain, Mayo 20th, 2004
